原代码相当于 $n \times (52428 \times 2^{16} + 52429) > 7(32+k) = \frac{h}{5}$ 故 $\left\lfloor \frac{5 \times (52428 \times 2^{16} + 52429)}{2^{32+k}} \right\rfloor = 1$ 因此 $k = \left\lfloor \log_2 \left(5 \times (52428 \times 2^{16} + 52429) \right) - 32 = 34-32 = 2.$
